Global Market Update

July was a strong month for the stock market, with most major indexes finishing in positive territory, and with considerably lower volatility along the way than in other recent months. Despite the continued elevated coronavirus case numbers, the S&P 500 is now in the green for 2020, fueled by generally strong earnings from the largest U.S. companies and hopes that a vaccine will be available by the end of the year. The S&P 500 gained 5.5% for its fourth straight positive month and its best July since 2010. The Dow rallied 2.38% for its fourth straight positive month. The Nasdaq Composite advanced 7% for its fourth straight positive month. The value of assets like gold and U.S. Treasury bonds—traditional safe havens that investors usually flock to amid bearish market conditions have uncharacteristically climbed in lock-step with equities, with gold prices hitting all-time highs and Treasury yields plunging to historic lows. For the month gold gained 9.01% for its best month since Feb. 2016. European Stocks posted their first monthly decline since a market selloff in March as growing doubts over a global recovery from the coronavirus crisis overshadowed a batch of strong earnings from technology firms.

Additionally, the company is the only export arm of Indian Railway for providing rolling stock overseas.

Outlook and valuation

RITES is a leading player in providing comprehensive range of consultancy services across various segments that include Railways, Roads, Ports and Airports. We believe RITES is well-positioned to gain traction in the infrastructure sector on the back of an impressive execution track record, well-built order book, a strong balance sheet with healthy return ratios. As a result, we expect strong revenue and PAT growth of 11% and 13% CAGR over FY20-22E. Hence, we recommend to **ACCUMULATE** stock. Based on 9.75x times FY22E EPS of Rs.30.4, we arrive at a target price of Rs.296/-, which implies 21% upside from the current level.

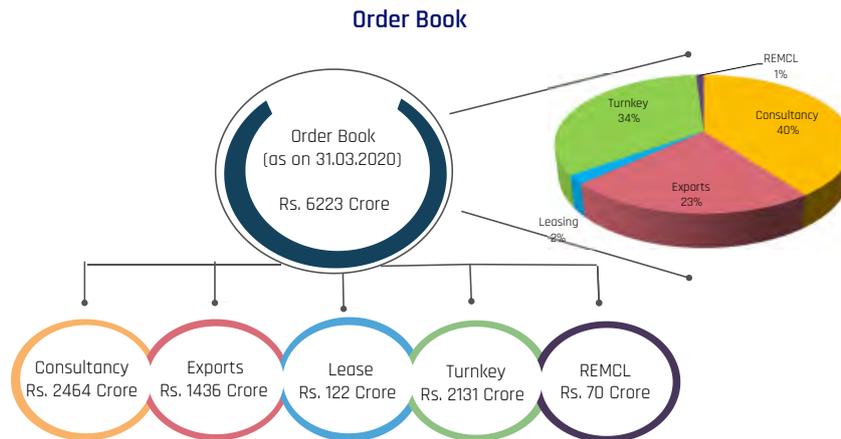

Service Offerings

Investment Rationale

Strong order pipeline providing healthy revenue visibility

RITES has a competitive edge in winning orders owing to its over four decades of experience in transport infrastructure consultancy and its association with Ministry of Railways. Moreover, Company is nominated by Ministry of Railways to undertake various EPC orders.

Marquee Clientele list

RITES have a vast clientele in domestic market including various central and state government ministries, departments, instrumentalities as well as local government bodies and public sector undertakings. Government's push on Infrastructure development

Government is expected to invest heavily in the infrastructure sector, mainly for highways, railways, renewable energy and urban transport. The Government in the Union budget 2020 has announced a plan to spend Rs 100 lakh crore on infrastructure in the next five years. Indian Railways capital outlay is expected to grow by 40- 50% in next couple of years; RITES, being leading player in the transport consultancy, is expected to be a significant beneficiary of the Indian Railway's infrastructure push. Opportunities within railways like track doubling, electrification, 3rd line up gradation of signaling systems etc along with railway station development offers ample scope for growth in future.

Strong financial track record & healthy balance sheet

Over the years, Rites has a successful track record of delivering consistent growth in sales and profits. In the last five years FY16- FY20, RITES's operating revenues and profitability have grown by a CAGR of 22% and 21% respectively. Further, during the same period, company's operating profit grew by a CAGR of 15%. Further company has managed to maintain its operating margin in the range of 24-26% during the same period. Company is virtually debt free. RITES being a consulting firm works on an asset light model with Employees as its key asset. During FY16 -FY20, Revenue per employee has grown by a CAGR of 18.9%. Company is virtually debt free. Rites has successful track record of dividend payout. Moreover, The Company has increased its Dividend payout consistently over the last 5 years, up to 67% in FY20 from 48% in FY16.

The COVID-19 Impact

Current nationwide lockdown is expected to have a significant impact on the company's operations especially in 1QFY21. Looking ahead, Management expect RITES' execution to pick-up pace from 2HFY21E onwards with steady ease in lockdown restrictions and government's thrust to kick-start the economy. Further, its turnkey services are expected to rebound sharply from 2HFY21E onwards owing to healthy order inflows, while its export and leasing segments are unlikely to be disrupted despite some slowdown in the near-term. Management highlighted that consultancy and exports business would be major growth drivers for next 2-3years.

Risks and concerns:

1. Slower than expected ramp-up in railway infrastructure
2. Order award deferrals.
3. Exports accounts for 10-15% of the RITES total revenue. Any major currency fluctuation could impact the financial performance of the company
